

Systems Engineer, Requirements Planning & Testing (Munich, Germany)

at Plus

Munich, Germany

About Plus

Plus is a global leader in the autonomous trucking revolution, with award-winning high-performance driverless technology. Named by Fast Company as one of the World's Most Innovative Companies of 2022, Plus is the only autonomous driving company with customers operating its product on the road today. Working with one of the largest companies in the U.S., vehicle manufacturers and others, Plus is making trucking safer, more fuel efficient, and more sustainable. Plus' industry awards include from [Fast Company](#), [Insider](#), [Consumer Electronics](#), AUVSI, and others. Based in Silicon Valley, Plus is looking for talented individuals to join its fast-growing teams.

Responsibilities

- Establish a robust vehicle platform system concept.
- Execute systems engineering practices that can be utilized across the company to guide product development.
- Meet with key stakeholders such as program management, external partners and leadership to develop program plans.
- Collaborate with partners to integrate Plus' solution into vehicle platforms.
- Organize vehicle commissioning, performance evaluation, and fleet issue resolution.
- Use requirements management tools to produce concept deliverables with OEMs, partners and customers.

Qualifications

- Bachelor's degree in Systems Engineering or related study .
- Minimum of 3 years of related industry experience.
- Strong organizational and communication skills.
- Working knowledge of automotive safety standards (ISO 26262, SOTIF etc).
- Proficiency in JAMA, or similar tool, for requirements management.
- Experience with vehicle level control software for powertrain, battery, chassis, etc.
- Knowledge of vehicle communication networks/protocols.
- Experience specifying, organizing and conducting vehicle test and validation.
- Proficiency in Python and C++, using linux based tools preferred, but not necessary.
-
